

The 2018 Engineering Class will spend their first week in Lincoln on the UNL campus participating in the Big Red Summer Engineering Camp. They will complete a Grand Challenge Workshop where their brain will come up with some great ideas to solve engineering problems. When they return to Holdrege, they will be working with Rajib Saha on DNA and John Hay on Energy. They will travel to Kearney to spend some time on the UNK campus with Ken Tranton as well as Industry Tours in both Kearney and Holdrege. We are very excited to be offering this opportunity to our students this year.
